

Spiked Disc Chain

Heavy duty Spiked Disc Chain combines effectiveness with utility

With 10 spikes surrounding each disc, the Spiked Disc Chain creates a blemish free soil surface for optimum planter performance. In the trailing direction the levelling and incorporating actions combine to provide a premium shallow running, self cleaning seedbed preparation tool.

The Spiked Disc Chain is very effective at removing weeds, making it an ideal tool for pre or post seeding clean up.

The shallow working depth and combining action means the Spiked Discs are light to pull and cover more acres at a higher speed, while the self-cleaning spikes handle wet conditions effectively.
