

Better Tillage. Better Tomorrow.

# KELLY 12X

Resistant weeds won't resist the KELLY 12X:  
*The Next Generation of shallow tillage.*

## Next-Gen Tillage

Are you looking for a way to control resistant weeds in turn rows? Or fix irrigation ruts in the field? Or level wheel ruts in a dirt road? Or prepare a food plot at your hunt club? Or a hundred and one other potential uses for a next-generation year-round soil maintenance tool? What you're looking for is the **KELLY 12X**.

## Easy-Pulling Versatility

The Kelly 12X handles wet fields, levees, farm roads, fallow ground - and it does it day after day, year after year. You can fit it with a wide range of Kelly Disc options, each with a unique design and purpose. It will control weeds, prepare a seedbed, level wheel ruts, and mulch crop residue. Even better, it does it all with a 60-80hp tractor.

## Shallow Depth, Deep Impact

Using the same technology as our game-changing Diamond Harrow, the Kelly 12X can smooth and level soil like nothing else. It works 12' wide, digs about 2" deep, and does a great job drying out those hard-to-reach spots in wet rice fields.

## 24 Months Warranty Cover

There are no hidden costs with the Kelly 12X. With sealed bearings and a durable steel frame, it'll outlast whatever you throw at it. Even if it doesn't, you can rest easy with our world-class warranty program, which covers most ground-engaging tools for 50,000 acres of work.\*
