

# CL2 Disc Chain

**A powerful disc for rough conditions and heavy soils.**

The CL2 Disc Chain consists of a concave, replaceable disc mounted in a heavy cast steel boss with a hook and eye link for linking together. This simple design offers power, efficiency and ease of service.

The design of the CL2 Disc provides penetration into tough soils while the weight and shape of the boss keeps the disc cutting and limits the working depth, making it our most powerful tool.

Made for heavy residue management and reliable weed control, the CL2 Disc Chain adds power and aggression to your KELLY Tillage System.
