

# R300 Disc Chain

**Close disc spacing makes this disc perfect for sandy soils**

The R300 Disc Chain consists of a concave wear resistant steel plate welded to a heavy steel chain with a 125mm (5 inch) disc spacing.

The 125mm disc spacing and deep dish increase overall surface area provides depth control in sandy soils, promoting shallow tillage in light to sandy soils.

The R300 is best suited to light to medium soils, and provides complete coverage when working shallow for improved weed control.

Unit Weight	Chain Weight	Disc Concavity	Diameter	Spacing
<b>9kg</b>	<b>73kg/m</b>	<b>35°</b>	<b>325mm</b>	<b>125mm</b>
