

CL1 Disc Chain

The most versatile of the KELLY Disc Chains.

The CL1 Disc Chain is a concave disc made from hard-wearing cast steel alloy with a hook and eye for linking together. These individual links make maintenance and servicing simple.

CL1 Disc Chains are the perfect tool for stubble management, working at a constant, shallow depth for weed control and levelling soil, while preserving precious moisture and soil health to give farmers a perfect and precise seedbed.

Using less fuel, labour and chemicals, the CL1 Disc Chain provides a cost effective way to prepare a seedbed and improve your bottom line.

UNIT WEIGHT	CHAIN WEIGHT	DISC CONCAVITY	DIAMETER	SPACING
11kg	70kg/m	35°	323mm	163mm
