

Warranty Registration Process

It is important that our machines are registered after they are purchased by a customer. Consider registering your machine as soon as possible, because **completing the warranty registration within two months of purchase provides an additional twelve months of warranty at no extra charge.**

Registering the machine will require:

- Distributor/Dealer contact information (business/trading name, email address, physical address)
- Customer contact information (name, business/trading name, email address, physical address, phone number)
- Machine details (model, front and rear chain types, serial number, place of purchase)

Open the Kelly Registration form on the Kelly Engineering website and fill it out. It is important that all sections of the form are completed before you submit the form.

Aus: www.kellyengineering.com.au/machine-registration/

USA: www.kellyharrows.com/machine-registration/

EU: www.kellytillage.eu/machine-registration/

Our warranty registration process is designed to provide us with the information that we need to ensure thorough and complete customer service. Because of this, it is important that all parts of the form are properly filled out.
