Wayville SA 5034

# Thank you for choosing a KELLY product.

We trust that you find the following manual clear and easy to follow. If you should require additional customer support or assistance, please do not hesitate to contact us.

Spare parts can be purchased, as required, through your local dealer or by contacting KELLY directly.

The KELLY team values your feedback. Should you have any difficulties that you wish to raise, suggestions for improvement or modifications that you feel would enhance our products we look forward to hearing from you.

# Contents

Section 1 - Unpacking	4
Section 2 - Assembly	6
Section 3 - Hydraulics	57
Section 4 - Diagrams	89
Section 5 - Specifications	90

## Legend

This symbol indicates which bag the relevant fasteners are in.

This symbol indicates which bag the relevant hydraulics are in.

This symbol indicates the hydraulics are in a box.

This symbol indicates which way the machine is travelling.

# Section 1 - Unpacking

We recommend the use of suitable lifting equipment with a lifting capacity of at least 4 tones.

Before unloading any loads please inspect exterior for damage.

## CAUTION

Take care when opening doors as load may have shifted or restraints may have broken.

- Remove boxes from doorway of container one at a time using a forklift truck. Each box weighs approximately (5512 lbs / 2500kg)
- Check strapping on each bundle before attempting to remove
- Attach chains to the packing frame using shackles and using suitable equipment (eg. forklift or tractor) drag framework bundles out of container. To move bundles away from front of container lift from side with forklift. Do not lift under angle iron frame, lift only under centre frame. Each bundle weighs approximately 7000 lb (3200 kg).

### CAUTION

Before cutting straps attach slings or chains and take the weight of the frames to avoid them slipping or falling and causing injury.

### CAUTION

Wear eye and hand protection when cutting straps. Sharp edges are exposed as straps separate and may cause injury.

### CAUTION

To avoid falling or moving components, before cutting straps attach slings or chains to individual pieces and only cut the straps holding the piece to be lifted.

- Remove boxes from rear of container one at a time using a forklift truck. Each box weighs approximately 5512 lbs (2500 kg)
- Cut straps holding bundles and separate parts and place in assembly area
- Once all parts have been identified, the machine is ready for assembly
- Identify parts for each machine by serial no. or description and separate. Open parts box and check that all parts are accounted for against checklist
- Read assembly instructions before proceeding.

# KELLY

## Section 2 - Assembly

Item No.	Description	Qty	Number
1	M24 x 55 grade 8.8 zp Bolt	11	0211-2455

## Please Note -

1. Unbolt tap handle from tap (as seen in image 1).
2. Flip one plate over so they are a mirror image (as seen in image 1).
3. Bolt tap handle back in original position (as seen in image 2)
4. Correct fitment will ensure taps are closed when both facing outwards on the machine (as seen in image 3).

2	Test Point Adaptor	1	0325-C81-1608

# Section 4 - Diagrams

## Mounting Swivels

### For Example

# Section 5 - Specifications

## Operating speeds

Operating speeds for normal conditions	
Chain type	Speed
Prickle Chain	6-10 Mph / 10-16 kmph
Disc Chain	6-8 Mph / 10-12 kmph
Transport / towing on roads	15 Mph / 25 kmph

## Chain Harrow specifications

<b>Model</b>	<b>2006</b>
<b>Working width</b>	6.4m
<b>Transport width</b>	2.4m
<b>Transport height</b>	3.9m
<b>Transport length</b>	10.4m

## Bolt Torque Settings

Bolt Type	Wheel nut				U Bolt			Grade 8.8 Bolt					Grade 10.9 Bolt	
	M18	M20	1/2"	9/16"	M10	M12	M16	M10	M12	M16	M20	M24	M20	M24
<b>Ft lb</b>	255	265	90	100	22	36	55	32	48	140	190	270	300	350
<b>Nm</b>	345	360	125	140	30	50	75	44	65	190	260	370	406	475

[1] When fitting a wheel & tire to a hub, tighten the wheel nuts in rotation to the correct tension. To achieve this choose a wheel nut & tighten, then proceed clockwise to the next wheel nut & tighten & so on until all wheel nuts are tight. Then repeat the procedure to check that all nuts are tight. Do not use impact tools to tighten wheel nuts. For a guide to the correct tension of the wheel nuts please use the appropriate tension for your size wheel nuts from the Bolt Torque Settings table.

Torque values are for dry threads and surfaces however it is permissible to apply a small amount of anti corrosive oil to the threads.

## Chain Quantities

Model		Length	CL2	CL1	W36	R300	SD49	Prickle chain
			CL2 disc chain also requires CL1 disc chain					
<b>2006</b>	Front right	4.51m	CL2 - 19 CL1 - 2	28	26	36	36	50
	Front left	4.53m	CL2 - 19 CL1 - 2	28	26	36	36	50
	Rear right	4.60m	CL2 - 20 CL1 - 2	28	27	37	37	51
	Rear left	4.62m	CL2 - 20 CL1 - 2	28	27	37	37	51

For correct chain tension, chain links may need to be removed from the end of the chain as follows:

CL2 Disc Chain - unhook disc chain link/s from end of the disc chain

CL1 Disc Chain - unhook disc chain link/s from end of the disc chain

K4 Disc Chain - unhook disc chain link/s from end of the disc chain

Spiked Disc Chain - cut a disc chain link from the end of the disc chain

R300 Disc Chain - cut a disc chain link from the end of the disc chain

W36 Disc Chain - cut a disc chain link from the end of the disc chain

Prickle Chain - cut a prickle chain link from the end of the prickle chain

Lined writing area consisting of horizontal lines for notes.
