

# CL1 Disc Chain

## The most versatile of the Kelly Disc Chains

The CL1 Disc Chain is a concave disc made from hard-wearing cast steel alloy with a hook and eye for linking together. These individual links make maintenance and servicing simple.

CL1 Disc Chains are the perfect tool for stubble management, working at a constant, shallow depth for weed control and levelling soil, while preserving precious moisture and soil health to give farmers a perfect and precise seedbed.

Using less fuel, labour and chemicals, the CL1 Disc Chain provides a cost effective way to prepare a seedbed and improve your bottom line.

Unit Weight	Chain Weight	Disc Concavity	Diameter	Spacing
<b>11kg</b>	<b>70kg/m</b>	<b>35°</b>	<b>323mm</b>	<b>163mm</b>
